RE: Knox County 09581601
Waste Stream No. 822375

Dear Sir:

In response to your letter of Nov. 10, 1982 and conversation with Mr. Robert Munger concerning City of Knoxville Waste Water Treatment Plant digested sludge, we propose to handle the sludge by (1) land spreading it over the first phase of the Wataga/Knox County Landfill, (2) we will not be receiving the sludge till spring of 1983, and will then spot loads regularly over the surface, level them off with bulldozer and incorporate the sludge into the surface with a disc and seed the area. We believe this will retain the sludge. Any run off will be carried by our corrugated pipes to draws, (3) there is no appreciable odors, (4) dozer, disc, and harrow will be used.

Very truly yours,

Jack A. Witt
